FOREWORD	4
PREFACE	5
SUMMARY FOR POLICY MAKERS	6
INTRODUCTION	12
PART I: PAN-EUROPEAN QUANTITATIVE INDICATORS FOR SUSTAINABLE FOREST MANAGEMENT	15
Part I Introduction	16
Criterion 1: Maintenance and Appropriate Enhancement of Forest Resources and their Contribution to Global Carbon Cycles	17
Indicator 1.1 Forest area	18
Indicator 1.2 Growing stock	22
Indicator 1.3 Age structure and/or diameter distribution	24
Indicator 1.4 Carbon stock	26
Criterion 2: Maintenance of Forest Ecosystem Health and Vitality	29
Indicator 2.1 Deposition of air pollutants	30
Indicator 2.2 Soil condition	33
Indicator 2.3 Defoliation	42
Indicator 2.4 Forest damage	45
Criterion 3: Maintenance and Encouragement of Productive Functions of Forests (Wood and Non-Wood)	51
Indicator 3.1 Increment and fellings	52
Indicator 3.2 Roundwood	56
Indicator 3.3 Non-wood goods	58
Indicator 3.4 Services	60
Indicator 3.5 Forest under management plans	62
Criterion 4: Maintenance, Conservation and Appropriate Enhancement of Biological Diversity in Forest Ecosystems	65
Indicator 4.1 Tree species composition	67
Indicator 4.2 Regeneration	70
Indicator 4.3 Naturalness	73
Indicator 4.4 Introduced tree species	76
Indicator 4.5 Deadwood	78
Indicator 4.6 Genetic resources	81
Indicator 4.7 Landscape pattern	84
Indicator 4.8 Threatened forest species	88
Indicator 4.9 Protected forests	92
Criterion 5: Maintenance and Appropriate Enhancement of Protective Functions in Forest Management (notably Soil and Water)	99
Indicator 5.1 Protective forests - Soil, water and other ecosystem functions	100
Indicator 5.2 Protective forests - Infrastructure and managed natural resources	103
Criterion 6: Maintenance of Other Socio-Economic Functions and Conditions	107
Indicator 6.1 Forest holdings	109
Indicator 6.2 Contribution of forest sector to gross domestic product	112
Indicator 6.3 Net revenue	118
Indicator 6.4 Expenditures on services	120
Indicator 6.5 The forest sector workforce	123
Indicator 6.6 Occupational safety and health	127
Indicator 6.7 Wood consumption	129
Indicator 6.8 Trade in wood	131
Indicator 6.9 Energy for wood resources	135
Indicator 6.10 Accessibility for recreation	138
Indicator 6.11 Cultural and spiritual values	139
Bibliography	141
PART II: PAN-EUROPEAN QUALITATIVE INDICATORS FOR SUSTAINABLE FOREST MANAGEMENT	143
Part II Introduction	144
A: Overall Policies, Institutions and Instruments for Sustainable Forest Management	145
Indicator A1 National forest programmes or similar	146
Indicator A2 Institutional frameworks	151
Indicator A3 Legal/regulatory frameworks and international commitments	156

Indicator A4	Financial instruments/economic policy	159
Indicator A5	Informational means	163
B: Policies, Institutions and Instruments by Policy Area		167
Indicator B1	Land use and forest area and other wooded land	170
Indicator B2	Carbon balance	173
Indicator B3	Health and vitality	176
Indicator B4	Production and use of wood	179
Indicator B5	Production and use of non-wood goods and services, provision of recreation	181
Indicator B6	Biodiversity	183
Indicator B7	Protective services	185
Indicator B8	Economic viability	187
Indicator B9	Employment (including safety and health)	188
Indicator B10	Public awareness	190
Indicator B11	Research, training and education	192
Indicator B12	Cultural and spiritual values	194
PART III: SUSTAINABILITY ASSESSMENT AND POLICY CHALLENGES		197
Part III Introduction		198
Assessing the Sustainability of Forest Management in Europe		199
1	Introduction	199
2	Concepts and methodology	200
3	Results and commentary, by country group	203
4	Issues about policy development and implementation	215
5	Conclusions and recommendations	217
The Way Forward: Four Major Challenges and Opportunities for Forest Sector Policy in Europe		223
Introduction		223
The forest sector and climate change		223
Wood and energy		224
Conservation of forest biodiversity		225
Sustainable forest management in a green economy		227
Conclusions and recommendations		228
Annexed Tables for Part III		230
Bibliography		245
ACKNOWLEDGEMENTS		248
DETAILED TABLE OF CONTENTS		250
ACRONYMS AND ABBREVIATIONS		257
ANNEXES		259
Annex 1	Pilot Application of the European Forest Types	259
Annex 2	Material and Methods	274
Annex 3	FOREST EUROPE Signatories	276
Annex 4	Pan-European Quantitative and Qualitative Indicators for Sustainable Forest Management	277
Annex 5	National Correspondents who Supplied Data on Quantitative Indicators for Sustainable Forest Management	279
Annex 6	National Correspondents who Supplied Data on Qualitative Indicators for Sustainable Forest Management	281
Annex 7	List of Authors	283
Annex 8	Output Tables	286
LIST OF TABLES		251
Table 1	Extent of forest and other wooded land, 2010	18
Table 2	Trends in forest area by region, 1990-2010	21
Table 3	Growing stock of forest by region, 2010	22
Table 4	Trends in total growing stock in forests, 1990-2010	23
Table 5	Carbon stocks in biomass separated on above- and below-ground components for different European regions in 2010	27
Table 6	Carbon stock in forest biomass 1990, 2000, 2005 and 2010, and annual rates of change between 1990 and 2005, and between 2005 and 2010	27
Table 7	Country specific median and 95% range of C/N ratios in forest floor and in mineral topsoil, and their respective proportion (C/N-index)	33
Table 8	Regional mean of organic carbon density in Organic Layer, Upper Soil Material and Combined Strata	35
Table 9	Reported forest area and forest area with damage	45

Table 10	Damage by insects and diseases	46
Table 11	Damage by wildlife	46
Table 12	Damage by forest fires	47
Table 13	Storm, wind and snow damage	47
Table 14	Overall forest damage trends, 1990-2005	49
Table 15	Net annual increment and fellings by region, 2010	52
Table 16	Felling rates (fellings as percent of net annual increment), 2010	53
Table 17	1990-2010 trends of net annual increment at regional level for the FOREST EUROPE countries	55
Table 18	1990-2010 trend of annual fellings	55
Table 19	Felling rates for 2010	55
Table 20	Volume and value of marketed and non-marketed roundwood, 2010	56
Table 21	Proportion of marketed roundwood from total removals, 2010	56
Table 22	Trend in volume and value of total roundwood, 1990-2010	57
Table 23	Quantity and value of marketed non-wood goods (NWGs): marketed plant products	59
Table 24	Quantity and value of marketed non-wood goods (NWGs): marketed animal products	61
Table 25	Share (percent and 1 000 hectares) of forest area (uneven-aged and even-aged) by regeneration types, European regions, 2010	70
Table 26	Share (percent and 1 000 hectares) of forest area by classes of naturalness for European regions, 2010	73
Table 27	Total area occupied by <i>Robinia pseudoacacia</i> in 2010 and <i>Pseudotsuga menziesii</i> in 2008 in selected European countries	77
Table 28	Trends in area of introduced tree species by regions	77
Table 29	Numbers of threatened forest-occurring tree species, birds, mammals, other vertebrates, other invertebrates, vascular plants, cryptogams and fungi in 2010	89
Table 30	Numbers of 'extinct in the wild' forest-occurring tree species, birds, mammals, other vertebrates, other invertebrates, vascular plants, cryptogams and fungi in 2010, by regions	91
Table 31	Area of forest protected and percent of protection for biodiversity (MCPFE Classes 1.1-1.3) and landscape (MCPFE Class 2), 2010	92
Table 32	Comparison between total Natura 2000 forest area provided by EU-27 DG Environment and the protected forest area collected by MCPFE Classes 1.1-1.3 and Class 2 for 2010	97
Table 33	Forest and other wooded land reported for the protection of soil, water and other ecosystem services in 2010 by regions	101
Table 34	Trends in area of forest and other wooded land reported for the protection of soil and water and other ecosystem services by regions, 2000-2010	102
Table 35	Forest reported for the protection of infrastructure and managed natural resources in 2010 by regions	105
Table 36	Trends in area of forest reported for the protection of infrastructure and managed natural resources by regions, 2000-2010	105
Table 37	Status of forest sector's value added distribution by region	113
Table 38	Forestry (ISIC/NACE 02) output value and value added	117
Table 39	Wood industry (ISIC/NACE 20) output value and value added	117
Table 40	Pulp and paper industry (ISIC/NACE 21) output value and value added	117
Table 41	Trends in net value added at factor costs in forestry, 1990-2010	118
Table 42	Trends in net entrepreneurial income of forestry, 1990-2010	119
Table 43	Amount of data collected on government expenditure on forest services, by year and region	121
Table 44	Government expenditure on forest services in 2010, by type of service and region	121
Table 45	Government expenditure on forest services in 2000-2010, by year and region	122
Table 46	Employment in the forest sector in Europe	123
Table 47	Annual change rate of forest employment by region for European countries	126
Table 48	Accident frequency per year in selected European countries	127
Table 49	Consumption of forest products, 1990-2010	129

Table 91	Criterion 5 Protective functions	242
Table 92	Criterion 6 Socio-economic functions	243
LIST OF ANNEXED TABLES		253
Annex Table A:	New European Forest Types	260
Annex Table B:	Data availability of mandatory indicators and coverage in the 46 countries of FOREST EUROPE	262
Annex Table C:	Countries reporting on voluntary indicators by EFTs (reference year: 2005)	263
Annex Table D:	Distribution of forest area by EFTs and by forest types applied in SoEF2007 in different European regions	265
Annex Table E:	Annual variation in forest area by European Forest Types in selected European countries	266
Annex Table F:	Variability in mean growing stock density by European Forest Types	267
Annex Table G:	Country variability in tree species composition by EFTs	269
Annex Table H:	Total deadwood amounts by EFTs	269
Annex Table I:	Extent of forests by European Forest Types	271
Annex Table J:	Growing stock (volume) in forests by European Forest Types	272
Annex Table K:	Data providers for reporting on Pan-European Quantitative Indicators	275
Table A1.1:	Basic data on countries, 2010	286
Table A1.2:	Extent of forest and other wooded land, 2010	288
Table A1.3:	Change in extent of forest, 1990-2010	289
Table A1.4:	Change in extent of forest available for wood supply, 1990-2010	290
Table A1.5:	Growing stock (volume) on forest, 2010	291
Table A1.6:	Change in growing stock on forest, 1990-2010	292
Table A1.7:	Growing stock on forest available for wood supply, 1990-2010	293
Table A1.8:	Age-class distribution - total of all even-aged forest stands, 2010	294
Table A1.9:	Carbon stock on forest, 1990-2010	295
Table A2.1:	Area of damage to forests by selected type of damage, 1990-2005	296
Table A3.1:	Increment and felling on forest available for wood supply, 1990-2010	298
Table A3.2:	Quantity and value of total roundwood removals, 1990-2010	300
Table A3.3:	Quantity and value of marketed non-wood forest goods, marketed plant products/raw material, 2005	302
Table A3.4:	Quantity and value of marketed non-wood forest goods, marketed animal products/raw material, 2005	304
Table A3.5:	Proportion of forest under a management plan or equivalent, 1990-2010	305
Table A4.1:	Forest classified by number of tree species occurring, 1990-2005	307
Table A4.2:	Forest, share of types of annual afforestation and regeneration, 2005	308
Table A4.3:	Forest area, by types of origin, 1990-2010	309
Table A4.4:	Forest by classes of naturalness, 1990-2010	311
Table A4.5:	Area of forest dominated by introduced tree species, 1990-2010 and share of forest area dominated by introduced tree species, 2010	312

Table A4.6: Average volume of standing and lying deadwood in forest, 1990-2010	313
Table A4.7: Areas managed for conservation and utilisation of forest tree genetic resources (<i>in situ</i> and <i>ex situ</i> gene conservation) and areas managed for seed production by countries in 1990, 2000 and 2010	314
Table A4.8: Areas managed for conservation and utilisation of forest tree genetic resources (<i>in situ</i> and <i>ex situ</i> gene conservation) and areas managed for seed production by selected tree species in 1990, 2000 and 2010	315
Table A4.9: Number of threatened forest tree species, classified according to IUCN Red List categories and in relation to total number of forest species, 2010	317
Table A4.10: Area of forest protected according to MCPFE Assessment Guidelines, 1990-2010	318
Table A5.1: Protective forest, according to MCPFE Assessment Guidelines, 2000-2010	320
Table A5.2: Protective forest and OWL, according to MCPFE Assessment Guidelines, 2000-2010	321
Table A6.1: Ownership of forest, 1990-2010	322
Table A6.2: Ownership, number of holdings of forest in size classes, 2010	323
Table A6.3: Contribution of forest sector to GVA (gross value added), 2000-2010	324
Table A6.4: Factor income and entrepreneurial income, 1990-2010	326
Table A6.5: Government expenditures for forest services, 2000-2010	327
Table A6.6: Employment, total and by gender, 1990-2010	328
Table A6.7: Occupational accidents, 1990-2010	330
Table A6.8: Consumption of forest products, 1990-2010	332
Table A6.9: Exports of forest products (volume), 1990-2010	333
Table A6.10: Imports of forest products (volume), 1990-2010	334
Table A6.11: Total energy production from wood, 2007	335
Table A6.12: Accessibility for recreation and intensity of use, 2005	336
Table A6.13: Sites with recognized cultural and spiritual values in forest and other wooded land, 2005	337
